When your dog follows you

Use one ordinary moment. If your dog is injured or panicking, contact your veterinarian first.

- ☐ Note what you were doing when your dog began to follow.
- ☐ Record whether your dog settled, watched, paced or tried to escape.
- ☐ Write down other changes in sleep, appetite, movement or daily routine.
- ☐ Call your veterinarian about a sudden change, distress or possible injury.

Time, activity and what your dog did next
